

JOIN US FOR A BREW & VIEW ON NOV. 13th

Find out how to organize documents and automate your workflows!

Perfect for Human Resources, Accounts Payable, Sales and more.

Top 5 Reasons Why Now is the Time for Content Services

Paper is everywhere. Areas such as accounts payable, human resources, contracts and legal rely on paper-centric processes, and that significantly slows down performance when processing thousands of incoming requests. Filing and retrieving paper is not just messy and time-consuming. It's also costly.

On November 13th from 4:30- 6:30 pm, SMG will be hosting an Infoseminar to show you more how you can cut costs, improve security and streamline operations with DocuWare. There will be Cocktails and Appetizers along with a presentation about this intuitive, effective document management software.

1. Time – information at your fingertip keeps everyone instantly informed and business moving forward
2. Money – transparent workflows keep you up-to-date so you can watch your bottom line
3. Space – put office space to better use
4. Compliance – password protected access, audit trail tracks all usage
5. Business continuity – disaster recovery (whether human or nature) gives you peace of mind

You will see a web-based document management solution in action and review technology best practices.

Learn how working with a single source provider simplifies every step from implementation to training and support.

This is an interactive session with plenty of time for your questions.

*7.5% of all business documents get lost and 3% misfiled.
